THE PROJECT

L4MS (Logistics for Manufacturing SMEs) is the new accelerator for the AGV manufactures, system integrators and manufacturing SMEs interested in automating the factory floor logistics. It is aimed to boost the production capacity and profits of European manufacturing SMEs and Mid-Caps.

OPEN CALLS

2018: 1st September - 30th November

Apply for financial, technical and business development support. You may be the next success story. SMEs and Mid-Caps are invited to submit business proposals to participate in the acceleration program.
